ALOE ARBORESCENS SUPREME IMMUNE HEALTH formula®

Aloe Arborescens Supreme Immune Health Formula is a nutraceutical dietary supplement / medical food that brings together the therapeutic properties of two potent ingredients of all natural Whole Leaf Aloe Arborescens liquid with pulp and raw unheated, unpasteurized honey that provide powerful support for the immune system and helps maintain optimal health.*

KEY BROAD-BASED BENEFITS:

- Optimal Immune function fortification and rejuvenation support for serious immune system suppression *1,2,3,8,10,11,12,15,16
- Gentle cleansing of toxicity for the whole body *1,2,8,9,10,11,12
- Stimulating macrophages and (white blood cells) that attack disregulated aberrant cells and cause their death *1,4,5,11,12,14
- Supporting the release of interleukins and cytokines which activate immune cells *1,2,3,4,5,6,11,12,15,16,17
- Supporting apoptosis (aberrant cell suicide) *1,2,3,6,15,16,18
- Stimulates the elimination of dysfunctional cells *1,4,5,11,12,14,18
- Helps regulate blood sugar levels, maintain healthy appetite *12
- For skin disorders helps promote restoration of normal healthy skin structure and function * PMID3066070
- Promotes Gastrointestinal Tract health and bowel regularity *3,8,9,10,11,12
- Promotes healthy blood and cardiovascular health *3,6,9,10,11,12
- Contains the complete array of aloe's health-promoting, active glucomannan polysaccharides 4% such as mannose (2ml per serving) to guarantee maximum effectiveness in immune system support *13
- Furnishes the body the complete spectrum of Aloe's 250 beneficial phytonutrient properties derived from liquid made from the whole leaf of the plant *9,10,13,15
- An adjunctive, complementary and integrative health care product *1,2,10,11,15,18
- Science-based, clinically verified, medical nutrition that potentiates other modalities. *1,2,10,11,15,18

Physicians are authorized by federal law under the Orphan Drug Act of 2005 to recommend this formula as a **MEDICAL FOOD** for the dietary management of medical conditions.

(The Orphan Drug Act of 2005 defined Medical Foods and authorizes physicians to recommend them as "...a food which is formulated to be consumed or administered internally under the supervision of a physician and which is intended for the specific dietary management of a disease or condition for which distinctive nutritional requirements, based on recognized scientific principles, are established by medical evaluation...." Section 5(b) of the Orphan Drug Act (21 U.S.C. 360ee (b) (3))

MAXIMUM STRENGTH ALOE:

U.S. Independent laboratory data shows that the whole leaf Aloe Arborescens liquid used in this product contains twice the amount of the immunomodulatory compound Acemannan for better health benefits as does the liquid produced from the whole leaf Aloe Vera plant.* 13

We found the secret to supreme immune health for every family member, including our pet.

Recommended Use: Use product for 10 days, then discontinue for 10 days and repeat cycle indefinitely as needed. For special use take daily indefinitely.

Serving:

Adults: Age 12 and Older One tablespoon in 2 to 4 oz. of water 3 times daily (breakfast, lunch, dinner) 20 minutes before each meal.
Children 6-12 years of age: One tablespoon twice daily in 2 to 4 oz. of water, 20 minutes before mealtime.
Children under 6 years of age: Consult your healthcare provider.
Pets: One tablespoon daily in small amount of drinking water. Consult with your veterinarian.

Supplement Facts

Serving Size 1 Tablespoon (15 mL)
Servings Per Container about 32

Amount Per Serving		% Daily Value
Calories	30	
Total Carbohydrates	7g	2%*
Sugars	4g	†
Proprietary Blend	15 mL †	
Krantz Aloe (Aloe arborescens) (whole leaf) (liquid & pulp), Honey (raw, unpasteurized)		

* Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

Other Ingredients: OptiMSM® (methylsulfonylmethane), Organic Grain Alcohol (1% v/v), Potassium Sorbate, Sodium Lactate, Citric Acid, Sodium Benzoate (to preserve freshness).

DISCOVERED IN BRAZIL AND CLINICALLY TESTED IN ITALY

Several medicinal plants and their formulas used by various indigenous peoples are the potential source of new healing remedies. For centuries native Brazilians seeking to recover health have

Father Romano Zago

Dr. Paolo Lissoni

traditionally used this immune support formula. Father Romano Zago, OFM (Order of the Friars Minor) Brazilian scholar, aloe researcher and author, publicized this Brazilian immune formula for the benefit of mankind in two books sold on Amazon. He collaborated with world renowned research oncologist Dr. Paolo Lissoni, at the St. Gerardo Hospital in Milan, Italy, division of oncology, along with 6 other top scientists to conduct a study using the traditional recipe as an adjunct to Chemotherapy with 240 test subjects. Half of them were given this remarkable recipe and the outcome was very beneficial. The results verified the recipe inhibits the proliferation of dysregulated aberrant cells ... exhibits immune-stimulating and antioxidant effects ... enhances survival time ... and reduces toxicities, as proven by radiological evaluations. * PMID: 19368145

SUPERIOR QUALITY

Our stabilized aloe is produced from 5-year-old Aloe arborescens plants harvested at the proper time, processed by the grinding the whole leaf into a liquid without heating, cold pressing or freeze drying in order to retain all the active glucomannan polysaccharides (4%), such as mannose (2ml per serving) to guarantee maximum effectiveness in immune system support. This product also contains unheated, raw, pesticide-

free US honey (6.4 g per serving) and 1% certified organic alcohol for the purest and most effective absorption when taken short or long term.¹³ Product stabilization is achieved using natural preservatives. For therapeutic purposes, the most efficacious Aloe arborescens is grown organically under controlled conditions in green houses on farms where the soil conditions are the best in the world. This species is grown in South America, South Africa, the southern border of the Mediterranean Sea, Italy, the Soviet Union and the Orient, but is not cultivated commercially in North America.

THE REMARKABLE CHEMICAL COMPOSITION OF ALOE ARBORESCENS AND ITS SYNERGY FOR IMMUNOMODULATORY AND PROTECTIVE ACTION

In Aloe arborescens, you will find a true arsenal of useful substances important and essential for maintaining healthy cell functioning, such as phytonutrient and nutraceutical properties derived from liquid made from the whole leaf of the plant. *1, 3, 4, 7, 8, 9, 10, 11, 12, 14, 15, 16

Recent clinical studies reveal the broad based immune health benefits from this formula are due in part to the synergistic activity among the various therapeutic constituents found in the sap, gel and the entire whole leaf of the botanical Aloe arborescens which has the highest concentration of these principles of all the known 250 aloe varieties, including Aloe vera. *1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 15, 16

Recent studies administered by the Palatinin Salzano Venezia Institute in Italy have discovered the Aloe arborescens is 200% higher in beneficial phytonutrient and nutraceutical properties than Aloe vera. *9, 10

As a result of intense and systematic research and analysis of this plant over the past 40 years, it is now possible to establish the chemical-physical and biochemical-nutritional characteristics of every molecular group that is part of this type of usable plant. Its results show that Aloe arborescens is made up of a vast series of more than 200 biologically active compounds including these three major groups:

- Polysaccharides (glucomannan also called Acemanannan)/for immunomodulation support
- Anthraquinone substances such as Aloin and Aloe-emodin which promote gentle body cleansing and healthy blood. *3, 4, 5, 10, 12, 15, 16
- Important naturally occurring beneficial phytonutrient and nutraceutical properties derived from the liquid made from the whole leaf of the plant such as enzymes, proteins, amino acids, metals, minerals and vitamins. *1, 3, 4, 5, 7, 8, 9, 10, 11, 12

HONEY AND DISTILLATE: THE POTENT CO-FACTORS IN THE FORMULA

Honey is able to move to all parts of the body — the remote corners. *2, 9, 10 Honey is the vehicle that carries the Aloe, which cleanses and removes the impurities. Honey supports general cleansing of the entire body. Honey has a low glycemic index of 61 compared to unsweetened orange juice of 50, Gatorade of 78, and baked russet potato, average 111. ("International tables of glycemic index and glycemic load values: 2008"). In the formula, honey protects the precious nutrients and medicinal properties of Aloe juice from air oxidation and gastric juices and allows them to be absorbed by the intestinal walls. Furthermore, honey is a powerful antiseptic, preventing germs from destroying vitamins. Several types of honey also have real healing properties as they are obtained from flowers of medicinal plants. Honey has been shown to have anticancer properties including the inhibition of tumor cell transformation and proliferation and induction of apoptosis (Swellam et al, 2003) *5,17,18 The distillate of organic grain alcohol (1% V/V) is the third component of the preparation which acts as a natural preservative. Another function is to help promote dilation of the blood vessels which helps speed up the gentle cleansing action of the aloe and honey. *9, 10, 16,17 PMID: 24566317
